

CIP Website Accessibility & User Guide

Making our research and resources easier to explore

The Center for Inclusive Policy (CIP) is committed to making information accessible to everyone. Our website includes tools and features to help visitors navigate content and adjust how information is displayed.

This guide explains how to use these features and find the information you need

Finding articles and other resources

Visit [CIP Insights](#) to explore all our blog articles, browse them by category, or use the search icon to find specific content by keyword.

Using the accessibility toolbar

The accessibility toolbar allows you to adjust the website's appearance according to your preferences.

Select the Accessibility button in the bottom-left corner of the screen to open the toolbar. The available options are organized into three categories.

Accessibility toolbar

Text

Bigger Text: Increase the size of the website's text to make it easier to read.

Visual

Contrast: Adjust the contrast between website elements and their background.

Grayscale: Display the website without colors.

Hide images: Hide images to reduce visual distractions.

Orientation

Reading mask: Help focus attention on a specific area of the page while reading.

How to use the toolbar

1. Select the Accessibility button in the bottom-left corner of the screen to open the panel.
2. Choose the feature you want to activate.
3. Select additional features according to your preferences.
4. To deactivate a feature, select its button again.
5. Select the crossed-out eye icon to hide the accessibility tool, or the X to close the panel.

Accessing Easy Read content

Some sections of our website include an Easy Read option, represented by an open-book icon. It presents information in a simpler format, using clear language to make complex content easier to understand.

Where available, select the Easy Read icon to access this alternative version of the content.

Tableau accessibility

Some sections, in particular the Data for Inclusion section uses Tableau, an interactive platform that allows visitors to explore information. An interactive map lets you select countries to access related disability data and budget analysis reports.

The dedicated India page features additional Tableau dashboards where you can explore national and state-level budget allocations in greater detail.

At the bottom of the India page, you can download the Tableau Accessibility Guide for instructions on keyboard navigation and interacting with the dashboards.

Navigating with a keyboard

You can use your keyboard to navigate websites without a mouse.

The following commands can help you move between interactive elements:

Tab: Move to the next interactive element.

Shift + Tab: Move to the previous interactive element.

Enter: Activate a selected link or button.

Space: Activate certain buttons and controls.

Escape: Closes dropdown menus, modal windows, or dialogs

Arrow keys: Navigate supported menus and controls.

These are general keyboard navigation commands. Specific embedded tools may have additional keyboard shortcuts.

You can also use your browser's built-in zoom settings to adjust the size of the entire page.

Useful to know:

- **Operable Principle:** In line with WCAG guidelines, all page functionality is available using a keyboard.
- **Focus:** A visual indicator (a border or outline) shows which element currently has keyboard focus.
- **Logical Order:** The tab sequence follows the page's visual and reading order, from left to right and top to bottom.

Navigating the website

Visit inclusive-policy.org to explore CIP's work, research, and resources.

The website has two navigation menus at the top of the page:

- Top menu: Provides quick access to Donate, Contact, Subscribe, and CIP's social media channels.
- Main menu: Provides access to Home, Social Protection, Community Support, Data for Inclusion, Fellowship & Trainings, and CIP Insights. You will also find the search icon here.

Use these menus and the links throughout the website to explore its different sections.

Explore the homepage

The homepage introduces CIP's work, our team, and the organizations we work with. You can also learn about our vision, mission, and values, access our 2027–2029 Strategic Plan, and discover featured research and insights.

Select buttons such as Explore more or Learn more to visit the corresponding pages.

Discover our areas of work

CIP's work is organized into four main areas:

- Social Protection and Community Support: Learn about our work in each area and explore related reports and blog articles.
- Data for Inclusion: Explore disability data resources and our budget analysis work, including a dedicated section featuring interactive budget data from India. You can also browse related reports and blog articles.
- Fellowship & Trainings: Learn about our Fellowship Program, meet our current and former fellows, and explore opportunities to develop disability research and policy skills.

Looking for something specific? Select the search icon in the main menu to search the entire website by keyword, including topics, publications, projects, and other content.

Need assistance?

If you experience an accessibility barrier, have difficulty accessing a document, or need information in an alternative format, please contact us.

Email: office@inclusive-policy.org

You can also use the contact form available on our website.

We welcome feedback that helps us improve the accessibility and usability of our digital resources.
